EXPERIENCE

Capital One

Philadelphia, PA

Senior Principal Software Engineer

October 2023 - Present

- Evolved and maintained an AWS-based transaction processing platform serving as a central hub for millions of daily transactions, driving technical direction across a critical production system.
- Integrated AI-assisted development infrastructure using BMAD and Claude, increasing feature delivery velocity by 50% as measured by team burndown rates.
- Architected and led continuous deployment initiatives across a 10-person engineering team, integrating Optimizely feature flags and rollback alarms to enable incremental production releases and reduce feature lead time by 60%.
- Directed a team of three engineers in designing and implementing an AWS Lambda-based end-to-end journey testing framework, achieving 90% system-level test coverage.
- Drove cross-team architectural modernization involving 10+ stakeholders across three teams, migrating a legacy store-and-forward architecture to real-time transaction processing.

Meta

NYC, NY (Remote)

E5 Senior Software Engineer

February 2022 - June 2023

- Developed systems in Python, Hack/PHP, and SQL supporting millions of Facebook Dating users.
- Designed and implemented multiple projects that reduced scammer prevalence metrics by more than 50%.
- Created an auto-balancing prioritization system that dynamically prioritized enforcement against the most harmful users.
- Leveraged A/B testing to measure project effectiveness and inform launch decisions, becoming a technical reference for Dating Integrity Enforcement systems.

L3Harris Corporation

Melbourne, FL

Chief Software Engineer

June 2013 - January 2022

- Led a team of three aircraft software engineers from project inception through formal qualification testing and customer delivery.
- Designed and implemented a proprietary algorithm for a TDMA radio that increased packet on-time delivery to 99.9%.
- Led integration of legacy modem software into a DevOps pipeline, reducing deployment time by 70%.

EDUCATION AND TECHNICAL SKILLS

University of Florida, Gainesville, FL

2009 - Spring 2013

B.S. Computer Software Engineering, Minor in Mathematics

GPA: 3.64 / 4.0

Languages: Java, Python, JavaScript, C/C++, Hack/PHP, SQL

Technologies: AWS (S3, DynamoDB, Lambda, ECS, Batch), Claude, Optimizely, Git, Jenkins, Jira

Certification: AWS Certified Solutions Architect - Associate
